Aqua blue paint  
13" stick or metal bar for hanging

### Technique and Tips:

If you are like me you love the look of transparencies but you may be baffled by the methods of adhering them to your pages.

For this layout I started with the Blue Bell Frame Transparency and added some Honeydew chipboard flowers to the outside of the frame. For the flower centers I added Blue Bell epoxy stickers as well as the chipboard for flower centers. From a piece of scrap transparency I punched a flower adding a touch of "Aqua" blue paint to the edges to give a hint of color. After placing my photos I took a permanent marker and "doodled" around the outside of the photo. A small epoxy photo corner was added to the upper photo.

### Instructions for hanging Transparency Layout:

Attach 2 white clips to a piece of honeydew notebook paper attaching ribbon to each clip. Wrap ribbon over stick or hanger attaching other end of ribbon to the remaining 2 white clips attaching your transparency. This layout is now a piece of memorable artwork that is enjoyed by all who visit my home.
